

# Connecting with a new friend

*When you need connection, click a button, and you'll share a conversation with a 'matched' new friend (avatar or video).*

By filling out a simple profile a matching algorithm can connect you to a human for 1:1 communication.

Pick what you are looking for when you launch the app:

"Need a Boost"

"Just want to chat"

"Want to share good news"

Opt in to the recommended person to connect with. "swipe left"

Set whether you show as avatar or video.

Turn on captioning if you like.

Graciously exit the call when you like:

"Thanks for the chat, something came up and I need to run."

"Nice to talk to you"

"Oops ... I'm burning something in the oven! Thanks for the call!"
