

OASIIS
Opening Access to Sustainable Independent Income Streams
Letter of support

Insights.US represented by **Dominik Wörner** is pleased to endorse and support the action submitted by Assist Social Capital CIC in response to the OpenIDEO BridgeBuilder Challenge. Addressing the urgent global challenge at the intersections of peace, prosperity and planet in radically new ways.

The project aims to build an economy which is equitable, fair, and regenerative, for people and planet. By hosting and supporting organisations which contribute to a constructive, rather than destructive economy, and connecting them with social investment, we can accelerate the overdue transition to a socially and environmentally just economy.

We believe that this initiative will help businesses that are driven by passionate entrepreneurs who try to reconcile economic development, environmental protection and social justice to be more successful. We are convinced that helping such businesses to succeed is key to bring the impact the world is looking for.

Insights.US as an end user within this socially and environmentally conscious business community, fully support the further development of OASIIS and its activities. We will support this action by providing advice and feedback on the idea to Assist Social Capital and contribute to the project activities, helping disseminate the project idea and activities in our community and taking part in the main events foreseen in the action, where possible.
