

Some of our key point PWA have become our friends, “partners”, PWA mentors and advisers as we design and improve our idea. They have been engaged from the inception meeting to current implementation. Please see our start and current status in pictorial with them. The first column represents our first meeting and the second where we are at.

Zipporah is a government employed teacher and influential PWA leader and activist.

Zipporah and Rachel Green Gates Ecofarm’s CEO

Zipporah received free eye glasses and sun screen lotion from Dr Choksey Albinism Foundation. She sees better in class and her skin is beautiful.

John is a local herbalist. He has a wealth of indigenous knowledge and has been very helpful in our agriculture and conservation

trainings.

John within the Self Help Group we have formed wrapping up our experiential Moringa tree planting training session.

John received free glasses but lost them. He has benefitted from the sun screen lotion and is scheduled to re visit Dr Choksey. She advised him to visit a dermatologist due to a growth on his skin but he cannot afford....yet. Our business model should earn him income for this.

Martin is our Youth PWA point person (far right). He is a youth PWA activist.

Martin making good use of his glasses during the Moringa tree planting training within the SHG.
