Lack of education is the main reason that we are lagging behind. My major concern is about global warming right now and as mentioned above, plastic plays a vital role. It's destroying Mother Earth. It's destroying our home. So it's the global issue right now. It's urgent to fix it before things go out of hand. And talking about Nepal government. They are full of trash and we cannot depend on them. As we can do more much responsible they are. And yes people mention, if we can do it better if our government. Why not? I mean we public are giving our best. We are just here working hard. Paying taxes, all this stuff. And what we get is a most polluted capital city, worst roads, worst education system, worst medical system, worst law system. I mean if they go ahead for their medical treatment. And public are dying due to lack of proper treatment. I don't mean to type my answer this long, but year at least it's all connected to our so called SYSTEM.
