

**OASIIS**  
**Opening Access to Sustainable Independent Income Streams**  
**Letter of support**

I, **Gabby Culver**, am pleased to endorse and support the action submitted by Assist Social Capital in response to the OpenIDEO BridgeBuilder Challenge to address the urgent global challenge at the intersections of peace, prosperity and planet in radically new ways.

The project aims to build an economy which is equitable, fair, and regenerative -- for people and for our planet. By hosting and supporting organisations which contribute to a constructive economy and connecting them with social investment, we can accelerate the over-due transition to a socially and environmentally just economy.

With over 15 years of experience building entrepreneurial ecosystems and managing programs in social entrepreneurship and impact investing, I am very excited about the potential of this interdisciplinary initiative to deliver new opportunities for connection, learning, innovation and investment that also address the Sustainable Development Goals -- tackling the big issues like climate change, social welfare, health and equity.

As an end user within this socially and environmentally conscious business community, I fully support the further development of OASIIS and its activities. I will support this action by providing advice and feedback on the idea to Assist Social Capital and contribute to the project activities, helping disseminate the project idea and activities in our community and taking part in the main events foreseen in the action, where possible.

Signed,

Gabby Culver
