

OASIIS

Opening Access to Sustainable Independent Income Streams Letter of support

EJIDO VERDE, represented by **SHAUN PAUL** is pleased to endorse and support the action submitted by Assist Social Capital in response to the OpenIDEO BridgeBuilder Challenge. Addressing the urgent global challenge at the intersections of peace, prosperity and planet in radically new ways.

The project aims to build an economy which is equitable, fair, and regenerative, for people and planet. By hosting and supporting organisations which contribute to a constructive, rather than destructive economy, and connecting them with social investment, we can accelerate the overdue transition to a socially and environmentally just economy.

We believe that this initiative will help Ejido Verde draw attention and support to our innovative regenerative forestry initiative creating solutions to wealth inequality and climate change, help us attract allies and collaborators globally, in addition to providing a platform to hopefully inspire others to learn from and with our innovative regenerative business model.

EJIDO VERDE as an end user within this socially and environmentally conscious business community, fully support the further development of OASIIS and its activities. We will support this action by providing advice and feedback on the idea to Assist Social Capital and contribute to the project activities, helping disseminate the project idea and activities in our community and taking part in the main events foreseen in the action, where possible.

A handwritten signature in blue ink that reads "Shaun Paul".

Shaun Paul,
CEO, Ejido Verde
