

OASIIS
Opening Access to Sustainable Independent Income Streams
Letter of support

Punto 3 srl, represented by Filippo Lenzerini is pleased to endorse and support the action submitted by Assist Social Capital in response to the OpenIDEO BridgeBuilder Challenge. Addressing the urgent global challenge at the intersections of peace, prosperity and planet in radically new ways.

The project aims to build an economy which is equitable, fair, and regenerative, for people and planet. By hosting and supporting organisations which contribute to a constructive, rather than destructive economy, and connecting them with social investment, we can accelerate the over-due transition to a socially and environmentally just economy.

Punto 3 srl has been working for several years in support of some Italian MAB UNESCO Biosphere Reserves, realizing for them projects aimed at the growth of human capital with a view to creating an economy and a social model at the same time satisfactory for the resident communities and in harmony with nature and territory. In the development of such projects we think, and we have had concrete evidence in recent years, that the comparison with similar realities, although located in other European and / or international contexts, is extremely effective especially for small social enterprises and their stakeholder. The comparison and networking is in fact a very important opportunity both to understand one's own value, often underestimated, and to exchange experiences and skills, build partnerships and create innovation. For these reasons we believe that this initiative is very important and we are interested and willing to support it and facilitate its development.

Punto 3 srl as an end user within this socially and environmentally conscious business community, fully support the further development of OASIIS and its activities. We will support this action by providing advice and feedback on the idea to Assist Social Capital and contribute to the project activities, helping disseminate the project idea and activities in our community and taking part in the main events foreseen in the action, where possible.
