

Smart Water Stations For Cities

Woosh is on a mission to change the way people drink water in public places.

Woosh deploys networks of smart water stations across cities, that provides tasty, chilled and purified water. It is an eco-friendly and affordable alternative to bottled water.

The Woosh service offers two main features: bottle rinsing and bottle refilling. Both features are offered at a fraction of the price of bottled water.

The stations are equipped with an innovative O₃- based water treatment system; and are remotely monitored 24/7. This ensures top quality drinking water at all times.

Benefits to the City

Health

Promoting healthy lifestyle + Keeping people hydrated

Walkability

Water stations help improving the city's walkability rating

Jobs

Generating new jobs by establishing local office and staff to operate the service

Carbon emissions reduction
