

OASIIS

Opening Access to Sustainable Independent Income Streams

Letter of support

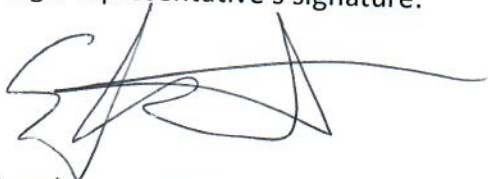

Challenges Worldwide represented by **Eoghan Mackie** is pleased to endorse and support the action submitted by Assist Social Capital CIC in response to the OpenIDEO BridgeBuilder Challenge. Addressing the urgent global challenge at the intersections of peace, prosperity and planet in radically new ways.

The project aims to build an economy which is equitable, fair, and regenerative, for people and planet. By hosting and supporting organisations which contribute to a constructive, rather than destructive economy, and connecting them with social investment, we can accelerate the overdue transition to a socially and environmentally just economy.

Having supported Assist Social Capital to maximise the use and applicability of the OASIIS platform in rural Ghana in Jan-Mar 2018, we have seen first-hand the value of the platform in connecting social entrepreneurs and encouraging sustainable trade between protected areas across the globe.

Challenges Worldwide as an end user within this socially and environmentally conscious business community, fully support the further development of OASIIS and its activities. We will support this action by providing advice and feedback on the idea to Assist Social Capital and contribute to the project activities, helping disseminate the project idea and activities in our community and taking part in the main events foreseen in the action, where possible.
