

PROJECT GOAL, MISSION AND OBJECTIVES

GOAL

To increase the participation of Ugandans in democratic and good governance health processes within Uganda.

MISSION

To empower youths through participation in and awareness raising on democratic and good governance health processes within Uganda.

OBJECTIVES

a) To strengthen and increase the development of partnerships between youths interested in health within Kampala district, by 2020, through using health youth networks and groups as partnership strengthening tools in the district.

b) To raise awareness among youths about democratic and good governance health processes within Kampala, by 2020, through using district community health social audits and grassroots community health dialogues as awareness raising tools in the district, and,

c) To strengthen the participation of youths in democratic and good governance health processes in Kampala, by 2020, through using district community health social audits and grassroots community health dialogues as participation strengthening tools in the district.

Current organization project activities

Our organization has done the above by establishing the Kampala youth project which has created a network of at least 12,100 youths who are encouraged to partner with, support and mentor one another. Additionally, we also share national, regional and international health opportunities with network members so that they join, support or participate in health initiatives. Further, we also support the partnership of 2 rural schools that cannot afford internet in Kampala, with Otley All Saints Primary School in Leeds, London through the connecting classrooms initiative by the British council, so that health violence against children ends in both schools.
