

OASIIS
Opening Access to Sustainable Independent Income Streams
Letter of support

Adventure Centre for Education (ACE), represented by Chris Saunders is pleased to endorse and support the action submitted by Assist Social Capital CIC in response to the OpenIDEO BridgeBuilder Challenge. Addressing the urgent global challenge at the intersections of peace, prosperity and planet in radically new ways.

The project aims to build an economy which is equitable, fair, and regenerative, for people and planet. By hosting and supporting organisations which contribute to a constructive, rather than destructive economy, and connecting them with social investment, we can accelerate the overdue transition to a socially and environmentally just economy.

We believe that this initiative will help in the steps towards making the above points become reality. Without initiatives like this, organisations are operating mainly in a solo and isolated capacity. By uniting and working together we are able to create a more dynamic force that can create positive energy towards change. As a collective effort towards creating prosperity for all in an economy that is equitable, fair and regenerative we will be taking steps towards achieving our ideal vision of the future.

The Adventure Centre for Education (ACE) as an end user within this socially and environmentally conscious business community, fully support the further development of OASIIS and its activities. We will support this action by providing advice and feedback on the idea to Assist Social Capital and contribute to the project activities, helping disseminate the project idea and activities in our community and taking part in the main events foreseen in the action, where possible.
