

## OASIIS

### Opening Access to Sustainable Independent Income Streams

### Letter of support

Haiphong City, Vietnam, June 04, 2018

**Cat Ba Biosphere Reserve Management Office**, represented by Mr Le Thanh Tuyen is pleased to endorse and support the action submitted by Assist Social Capital CIC in response to the OpenIDEO BridgeBuilder Challenge. Addressing the urgent global challenge at the intersections of peace, prosperity and planet in radically new ways.

The project aims to build an economy which is equitable, fair, and regenerative, for people and planet. By hosting and supporting organisations which contribute to a constructive, rather than destructive economy, and connecting them with social investment, we can accelerate the overdue transition to a socially and environmentally just economy.

We believe that this initiative will help Cat Ba UNESCO Biosphere Reserve to strengthen its capacity in cooperating with international experts and European networks of biosphere reserves and social enterprise initiative, esp the OASIIS/Social Enterprise and Biosphere Reserve Development Framework by the ASC, to better local effective solutions for sustainable nature conservation and development in line with the UN's Sustainable Development Goals (SDGs 2030) and Lima Action Plan of the World Network of Biosphere Reserve 2016-2025 in Cat Ba BR, Vietnam.

**Cat Ba Biosphere Reserve Management Office** as an end user within this socially and environmentally conscious business community, fully support the further development of OASIIS and its activities. We will support this action by providing advice and feedback on the idea to Assist Social Capital and contribute to the project activities, helping disseminate the project idea and activities in our community and taking part in the main events foreseen in the action, where possible.

Mr Le Thanh Tuyen, Official, Cat Ba Biosphere Reserve Management Office
