**RE: CONFIRMATION OF PARTNERSHIP.**

I have the pleasure to confirm that for the last ten years we have been in partnership with Green Gates Ecofarm. We work towards wetland restoration, conservation and management for sustainable environment, food security, income generation, job creation and recreation. We have used the facilities on the farm for training the community on good fish pond farming management skills. These include taking care of gold fish propagation, tilapia, catfish and koi fish rearing.

The community has been able to learn more about value addition and best practice of handling fish after harvesting.

On this farm we have five fish ponds constructed to conserve the wetland, all stocked with different species of fish.

We are happy to be in partnership.

Yours sincerely,
