

BOTH 'LOSERS' AND 'WINNERS' APPROACH US FOR OUR SERVICES/PRODUCTS

While requesting us for toilets and or rainwater harvesting systems – mainly because of water starvation and toilet-less-ness – the 'loser' must nominate their favourite 'winners'.

While requesting us to make rain water safe for them – mainly because municipal water is not enough for both the 'losers' and the 'winners' – the 'winners' must nominate their favourite 'losers'.

We build the toilets and or rainwater harvesting systems and mark the toilets/systems with logo/name of the nominated winner on condition that the winner spreads (brags about) fact that they were nominated to do the marking.

The bragging must be on off line news media at no extra cost.

We make rain safe for the winner.

Also, we build toilets and or rainwater harvesting systems and mark the toilets/systems with logo/ name of the winner on condition that the winner spreads (brags about) fact that they use rainwater in order for others to have plenty of low cost municipal water.

The bragging must be on off line news media at no extra cost.

Due to the bragging, more villages and schools hear about our products/services and they request for our products/services
